

MANAGING SCHOOL CONTRACTS

Sherlock works with many transport companies that operate taxi transport for schools and children.

To fulfil these contracts, taxi companies must be able to demonstrate their ability to meet the demand whilst prioritising the safeguarding of pupils.

What are the challenges that businesses with these contracts face?

School run trips often have very specific requirements, such as:

- ✔ Trips that need to take place daily, or certain days of the week but not during school holidays (which have changing dates)
- ✔ The need to use the same driver and/or vehicle for each repeat booking - and a chaperone for the booking
- ✔ Parents may need visibility over the trip
- ✔ The ability to easily cancel individual bookings, for example, if a child is sick and won't be attending school that day

How can Sherlock Taxi dispatch help?

Sherlock has customers across different locations that need support to manage safe transport. We provide the tools to enable safe and secure transport - harnessing technology to prioritise delivering timely transport whilst ensuring safeguarding remains at the forefront of the service.

Sherlock removes the laborious nature of manual admin through creating work schedules that can be automated.

What can Sherlock do?

- ✔ Remove the laborious nature of manual admin through automated work schedules
- ✔ Schedules that consider repeat bookings with calendars designed to manage school holidays
- ✔ Automated tracking links – parents can track children safely to and from school
- ✔ Ability to ensure only approved drivers are allocated the trips
